

DETAILS AND SPECIFICATIONS

This project totally consists of my details. This website is made by using html and css codes, this project will not take any input values or data. It is only a basic project. The design and structure is totally made by my own. Each and every functional codes are written in my style.

This have 1 main page and 5 sub pages. Each and every page will be easily understand. The code will be simple and basic. I have implemented maximum all the things that I have learnt in workshop. In my next project I am going to add some specifications like taking the input values.
